

OZEKI NG – SMS GATEWAY

PRODUCT DATASHEET

Last updated: 7. Jan 2008.

OZEKI NG – SMS Gateway	
<p>Introduction</p>	<p>OZEKI NG – SMS Gateway is a high capacity SMS server that is very popular among ISV/OEM, Enterprise, and Community Users. It is recognized for its superior ease of use, performance and reliability.</p> <p>The software can be used to send and receive SMS text messages and various other message types, such as WAP push messages, operator logos and ring tones. The sending is done through IP SMS connections or GSM Modem connections.</p> <p>OZEKI NG – SMS Gateway makes it possible to connect any application implementing business logic directly to the Short Message Service Center (SMSC) of a GSM service provider. This connection is possible through the Internet or through a leased line. Software developers and system integrators prefer OZEKI NG – SMS Gateway, because it provides easy to use connectivity options and application programming interfaces (APIs) for both sending and receiving.</p> <p>Concerning performance, the software has an outstanding capacity. It can serve 300 sms/second on several SMSC connections simultaneously on a standard Intel P4D, 3GHz 1GB RAM computer. The server can handle large number of concurrent applications and user connections.</p> <p>The software is reliable. It was designed to operate 24 hours a day / 7 days a week under heavy duty. It manages network link failures, network service provider failures, tolerates hardware reboots.</p> <div data-bbox="901 465 1399 840" style="text-align: right;"> <p>Direct link over IP to the GSM service provider (SMPP, UCP/EMI, CIMD2)</p> </div>

<p>E-mail</p>	<p>Sales information: info@ozekisms.com Technical information: techsupport@ozekisms.com</p>
<p>Package contents</p>	<p>CD ROM – Software Installation Package CD ROM – Full product documentation License certificate Printed product documentation (optional)</p>
<p>License</p>	<p>Commercial, lifetime</p>
<p>Technical support</p>	<p>Live technical support is available over telephone / e-mail / Instant messaging in business hours (Mon-Fri, 9 a.m. to 5 p.m. GMT+1). On site support is also possible provided the travel expenses are covered. Please note that once the software is installed and configured properly usually very little support is required</p>

OZEKI NG – SMS Gateway	
OS Support	Windows 2000 Windows 2000 Server (Standard Edition, Enterprise, Datacenter) Windows XP (Home Edition, Professional) Windows 2003 Server (Standard Edition, Enterprise, Datacenter, Web Edition) Windows Vista
Hardware	CPU: Pentium IV 3 GHZ or Compatible, RAM: 1 GB HDD: 40 MB free disk space
Network connection	ISDN, ADSL, Cable, T1, Lease line, Ethernet or any other internet connection
Features	Message queues (store and forward) Message routing Multi user architecture Multiple SMSC connections Network link management Load balancing API-s for programming languages Database connection
Clients	Outlook client Excel client Ozeki client
Capacity	Depends on the hardware. With an Intel P4D 3Ghz CPU, 1 GB RAM, you can expect the following capacity: 300 messages / second
Supported protocols	SMPP 3.3 / 3.4 UCP/EMI 4.0 CIMD 2.0 GSM Modem HTTP Client / Server
Limitations	The limitations depend on the license you purchase. Licensing information is available at: http://www.ozekisms.com/index.php?owpn=242 The license type determines the following: - The message capacity - How many service provider connections can you setup - How many applications (or users) can be configured on the system
API-s	SQL, HTTP, ASP 2.0 / ASP, Visual Basic, C#, C/C++, Delphi, Java, JSP, Coldfusion, PERL, PHP, Ajax, Atlas, Lotus
Message types	GSM Text SMS, Unicode Text SMS, Multipart (Concatenated) SMS messages, Flash SMS, Group graphics, Operator logos, Ring tones, WAP push messages, Screensavers, Nokia business card (VCard), Nokia calendar (VCalendar), Bookmarks, Animations, EMS, Binary messages,...
